

AEROSOLS - 400 ml.

Art. No 1001-400

RED PRIMER

RED PRIMER is a fast drying acrylic paint, it is suitable for priming a wide range of metals, wood and plastics prior to top coating. It is compatible for spraying over acrylic and cellulose, but not alkyd systems as "wrinkling" may occur. It is compatible for being over-coated with cellulose, acrylic, alkyd, p/u-alkyd and epoxy.

Art. No 1002-400

GREY PRIMER

GREY PRIMER is a fast drying acrylic paint, it is suitable for priming a wide range of metals, wood and plastics prior to top coating. It is compatible for spraying over acrylic and cellulose, but not alkyd systems as "wrinkling" may occur. It is compatible for being over-coated with cellulose, acrylic, alkyd, p/u-alkyd and epoxy.

Art. No 1003-400

ZINC GALVANIZE

ZINC GALVANIZE is ideal for use in production, maintenance and marine- & construction industries. It can be used as a coating on pipes and steel fabrication to reduce corrosion, and as an exceptionally good primer coat. It protects welds on both bare metal or previously galvanised surfaces and as a touch up for hot galvanised surfaces. It protects iron, piping, ducts, water tanks, automotive and marine parts. It is compatible for spraying onto acrylic or cellulose paints but will cause "wrinkling" if used on alkyd systems, it may be over coated with acrylic, cellulose, alkyd, p/u-alkyd and epoxy.

Art. No 1004-400

SILICON SPRAY

SILICON SPRAY may be used to restore, clean and condition all types of hard surfaces.

MARINE USE: Hatch cover gaskets, Door rubber sealings, electrical insulating (protects against moisture).

CAR USE: vehicle rubber gaskets, dashboards, bumpers, vinyl seats and plastic door trims. The product is also helpful in eliminating minor squeaks resulting from plastic parts rubbing together. Protects ignition systems and electrical systems against moistness.

Protects Chrome, Aluminium etc....

Art. No 1005-400

WINDOW & PC SCREEN CLEANER

WINDOW & PC SCREEN CLEANER gives a clean and film free surface on Windows, PC-screens, Mirrors, Office Machines surfaces etc....

Art. No 1006-400

BARRIER CREAM

BARRIER CREAM is effective against a wide range of soils and acts as a good moisturiser and replenishing cream. It is easily absorbed into the pores of the skin providing protection against oil, grease and dirt. It forms a barrier that protects against dilute acids, alkalis, paints, resins, epoxies, plastics, inks, tars, petroleum solvents etc that may contribute to skin irritations.

At radioactive works it has a preventive effect from deep skin contamination. Makes easier cleaning -washing off the skin.

AEROSOLS - 400 ml.

Art. No 1007-400

ELECTRO CLEANER - DRY

ELECTRO CLEANER -DRY removes oil, grease, carbon dirt and dust. Evaporates quickly to leave a film-free surface. Non corrosive safe on rubber, nylon, paints, metals and varnishes. Recommended for general electrical cleaning.

Art. No 1008-400

UNIVERSAL LUBE

LUBRICATES, RUST PROTECTS, DISSOLVES RUST.

UNIVERSAL LUBE is a high-grade general-purpose lubricant. It provides easy, accurate and economical application on all types of machinery, small lightly loaded bearings etc.

It is ideal for use in difficult places and where lubrication is usually carried out by the conventional oil can method.

Art. No 1009-400

RUST-OFF GRAPHITE

RUST-OFF is graphite-penetrating oil to rapidly and efficiently free and loosen seized nuts, bolts and hinges etc. The inclusion of a residual lubricant helps reduce friction during dismantling and leaves a film to help protect against further corrosion.

Art. No 1010-400

DEGREASER-COLDWASH

DEGREASER-COLDWASH is an efficient degreaser for a wide range of applications. Degreasing/cleaning of engine parts, motor blocks, filter cleaning, general in situ cleaning etc...

Art. No 1011-400

ANTI - RUST WAX

ANTI - RUST WAX is a de-watering anti-rust agent spray giving a light low viscosity solvent and oil blend, giving excellent penetrating properties. It is a high performance, multi application fluid that has excellent de-watering and anti-corrosive properties.

Art. No 1012-400

HIGH. TEMP ANTI-SEIZURE

HIGH TEMP. ANTI SEIZURE is an anti seizes lubricant to be used as general grease in a wide range of Automotive, Marine, Industrial and Construction Industry.

It is an effective lubricant without degradation to:

275 C (525 F) and as a release agent to 1200 C (2200 F).

It is an anti-seize paste for assembly of bolts and flanges in high temperature environments and is also used as a brake calliper anti seizes compound in the automotive industry. The presence of solvent allows for penetration into chains, hinges and locks. etc.
